Professional Pet Food Making Machine With Custo

Design Service

Detail Introduction :

Introduction of Pet Food Making Machine:

Pet food production line is the company combined with years of experience in the development of tw
puffing machine, and then developed a successful new pet food production line, the pet food produc
to pet food with a novel shape, unique taste and color, and the most scientific nutritional ratios and e
digest and other features to adapt to the evolving pet food market.

The technical advantages we have acquired over the years in the field of puffing extruder are fully ref
the pet food line. The operation is simple and easy to learn, thus ensuring that the product is finished
specific temperature, pressure, humidity and time. Reasonable structural design, special materials, fa
automatic cleaning performance ensure the stability of the machine and easy maintenance.

We improve the palatability of dog food, dry dog food, puffed to become crispy, pet dogs in the proce
biting off and swallowing, have a better taste and clean mouth teeth role.And change and improve th
nutritional value of dog food, many nutrients are required to be cooked and puffed to become nutriti
otherwise not only will not bring effective nutrition to the pet dog, but will cause diarrhea, vomiting a
indications.At the same time to improve the digestion and absorption rate of dog food, puffed dog fo
dog absorption up more comprehensive and perfect, there is even a "double puffing" process, the pu
to make the pet dog more perfect to absorb all the nutrients in the dog food.And change the content
different nutritional indicators of dog food, such as reducing water can improve the shelf life of dog f
more convenient for pet owners to store and feed at any time, anywhere, and safe, and convenient; A
change the density of dog food, extrusion granulation, puffing can also increase the bulk density of d
easy to purchase and transport.Finally, the puffing process is also a high-temperature and high-press
process, can kill a variety of mold, Salmonella and other harmful substances, to improve the safety of
food, health.

The whole pet food production line can automatically complete the production from mixer,screw conveyor,twin screw extruder,air conveyor, multi-layer oven,flavoring line to the finished product.

Production capacity	120-2000kg/h
Electricity supply	Customised according to your local electricity situation.
Machine details	1.Stainless steel:201, 304, 316, on request. 2.Electrical components can be ABB, Delta, Fuji, Siemens, famous brands.
Certificates	CE,GOST,TUV,BV,SGS
