

800-2000kg/h Soyabean Badi Making Machine With Double Screw Extruder

Specifications :

Price	Contact us
Brand Name	LOYAL
Place of Origin	Shandong China
Min.Order Quantity	1
Payment Terms	T/T,L/C,D/P
Supply Ability	25 days /soya nuggets manufacturing plant
Delivery Detail	20days--35days
Packaging Details	Wooden case or wooden pellets depended on clients' require
Warranty	1 YEAR
Material:	Stainless Steel 304
Certification	CE BV ISO 9001
Trial Demonstration	Welcome You To Visit Us At Any Time For Machinery Demonstration
Automation	Fully Automatic
After-sales Service Provided	Engineers available to service machinery overseas

The 800--2000kg/h soyabean badi making machine with double screw extruder adopts twin-screw extrusion technology, based on our company's years of experience in extrusion equipment production, combined with the research and development of advanced equipment at home and abroad. The main raw materials of the soybean meat production line are soybean meal, peanut meal, etc., which form a layered fibrous structure through technical processes such as stirring, extrusion, and drying. The fully automatic soya meat making machine produces high protein content, has the state and taste of meat, and has the characteristics of oil absorption, water absorption, and taste absorption. The product does not contain cholesterol and animal fat, and has a delicate taste. Industrial soya meat production machine can be widely used in meat products, fast food, quick-frozen food, and can also be made into various vegetarian snack foods and vegetarian dishes.

Application of Soyabean Badi Making Machine in Manufacturer

Application of Soyabean Badi Making Machine	
Item	Automatic Soya Meat Making Machine
Raw material	De-fat soybean protein powder, soybean dregs,soybean meal.
Finished products	Textured soya protein,vegetarian soya meat,soya nugget.

?MAIN FLOW CHART OF SOYA MEAT PRODUCTION LINE

1.Flour Mixer 2. Screw Conveyor 3. Twin Screw Extruder
4. Air Conveyor 5. Multi-layer Oven 6. Cooling Conveyor

Flow Chart of Soyabean Meat Making Machine

Equipment List of Soyabean Badi Making Machine	
Flour Mixer	To mix defeated soya bean flour with water: the raw material adding to water and liquid chemical additive fully mixing in it. This part that touches mixer to material adopts the stainless steel material. The discharge hole adopts the new handle-opened design. It has the good seal so that the materials.
Screw Conveyor	The mixed materials can be conveyed through it to the extruder feeder without any leaking, dusting and pollution; feed quantity and speed is even and stable.
Twin Screw Extruder	To cook the soya bean powder and extrude in different shapes: the Twin Screw Extruder includes feeding, extruding, cutting, heating, transmission and controlling system. The screws are made of the alloy steel; The forced lubrication system; Auto-temperature control system; Auto-speed control system Self-cleaning. With the extruder, the starch is modified via heating and pressing.
Air Conveyor	Take the extruded products into oven or drying machine
Drying Machine	It is a continuous production of drying equipment, it can use multilayers stainless steel mesh belt to achieve the material's feeding, transporting and discharging. It is used for continuous drying and cooling of agricultural products, medical herbs, pellets snacks, pastes, pet food or others.

TECHNICAL PARAMETER OF SOYA MEAT PRODUCTION LINE FOR SALE

Technical Parameter of Soyabean Badi Making Machine			
Model	Extruder Power	Output	Extruder Dimension
LY-65-TVP	45 kw	100~150kg/h	3600x1000x2000mm
LY 65	45kw	120~160kg/h	3200x1000x1800mm
LY 75-TL	140 kw	200~300kg/h	5200x1000x1900mm
LY 75-E	125 kw	400~500kg/h	5900x1000x1900mm
LY 85-V	110 kw	300-400 kg/h	5900x1000x1900mm

LY 100	160 kw	1000kg/h	5700*1300*2500mm

Machine Parts of Soya Meat Machine

Advantages Of Double-Screw Extruder Technology

Advantages of Soyabean Badi Making Machine	
Automatic type	Fully automatic.
Highly efficient	High efficiency, hygiene, safety. From mixing material to package 2-3 workers are enough.
Factory environment	Without leak of powder dust.
Raw material of finished powder	More raw materials can be used in one production, Such as rice flour, corn flour, soybean flour, oats, buckwheat, etc., and various nutrients can be added at the same time.
Finished powder	After expansion, nutrients are easily absorbed by human body.

?ADVANTAGES OF SOYA MEAT PRODUCTION LINE FOR SALE

The automatic Soyabean Badi Making Machine is designed based on advanced twin-screw extrusion technology. soya meat extruder has changed the traditional production process. The production process of a commercial soya meat machine is automated mixing, extrusion, and drying. In addition to soybean meal, the available raw materials can also be undefatted protein powder, etc.; soya badi making machine is tissue-shaped soya meat manufacture use soy protein isolate and soybean defatted soy flour as raw materials, The 800-

2000kg/h Soyabean Badi Making Machine With Double Screw Extruder by milling, mixing, extruding, cutting and packing to get isolated protein, textured soya protein, vegetarian soya meat for sale. Soybean meat in various shapes can be produced to meet the different needs of customers. Soyabean Badi Making Machine are manufactured by us using superior high grade raw materials and latest technology, Our expert professionals aid us in providing highly efficient machines to our clients. All of these soya meat manufacturing project go through rigorous testing to ensure quality and fault free delivery of products. Our soya badi making machine with double screw extruders are highly appreciated by our customers for their robustness and long life.

FINISHED PRODUCTS PICTURES

The raw material of soya meat is defatted soybean meal, and the main components are protein (more than 50%) and carbohydrates. Soya meat does not contain cholesterol, has low sugar content, high digestibility, and is rich in a variety of amino acids necessary for the human body. It is an ideal complete protein. The soya meat production line is extruded by twin-screw, processed under short-term high temperature, high water content and high pressure to rearrange the protein molecules neatly. It has a same-directional structure and a meat-like porous structure, so it has excellent water retention and Chewy. Textured soya protein can be divided into flakes, chunks and granules in shape; it can be divided into primary colors and red in color, and it has a wide range of uses.

2021 Customer Order Soya Meat Manufacturing Form

Dealed Customer Customers Who Have Not Worked In The Soya Meats Industry Before In 2021

1	China 300t/Year Soyabean Badi Making Machine
2	1t/h Soya Meats Equipment For Sale In Indian
3	1t/h Soya Meats Equipment For Sale In Bolivia
4	Senegal 1t/h Soya Meats Machine
5	1t/h Soya Meats Machine For Sale In Côte d'Ivoire

Customers Who Understand Soya Meats Processing Technology

1	1t/h Soya Meat Machine Sold In Russia
2	1t/h Soya Meat Brands For Sale In Uzbekistan
3	1000kg/h Soya Meat Equipment For Sale In Senegal

4	Mozambique 1t/h Soya Meats Hot Machine
5	Bangladesh 2t/h Soya Meats Hot Machine
Dealed Customer Have Plant Of Soya Meats Production Line In 2021	
1	1t/h Soya Meat Brands Machine
2	Uzbekistan 1t/h Soya Meats Manufacturing Equipment
3	Usa 1t/h Soya Meats Manufacturing Equipment
4	800kg/h Soya Meats Manufacturing Equipment For Sale In Nigeria
5	Algerian Soya Meats Hot Machine
Dealed Customers Who Low-Price Purchase Soya Meats Production Line In 2021	
1	Sudan 200kg/h Soya Meats Production Line
2	Moldova Small 200kg/h Soya Meats Production Line
3	200kg/h Soya Meats Production Line Sold In Ukraine
4	Nigeria 150kg/h Soya Meats Hot Machine
5	Austria Sells Industrial Soya Meat Production Line
